

To enable MP3 and MP2 export from Peak, you will need to install the "LameLib" MP3 encoder and the "twolame" MP2 encoder. The first set of instructions are for users with Mac OS 10.6, the second set of instructions are for users with Mac OS 10.5 or 10.4.

Please follow these steps to install the downloadable MP3 and MP2 encoders in 10.6:

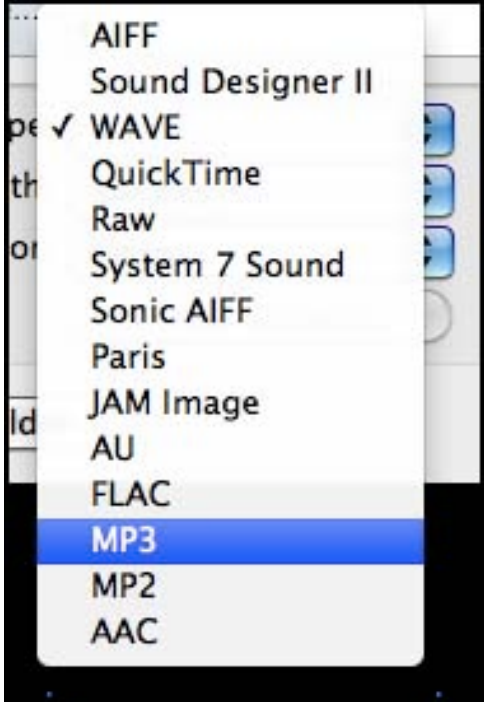

1. Download from this URL:
http://www.bias-inc.com/downloads/updates/archive/MP3_MP2_encoders_inside.zip
2. When this file is done downloading, it should un-Zip itself and create a folder called "MP3_MP2_encoders_inside". This folder contains both encoders and these instructions.
3. Quit the Peak 6 application if it is running
4. Hold down the Control key and Click (or "right" click) on the Peak application icon — this is located in the Applications folder on your Mac.
5. Select "Show Package Contents" from the list within the pop-up menu

6. Open the "PlugIns" folder
7. Drag the "LameLib.bundle" and "twolame.bundle" into the "PlugIns" folder

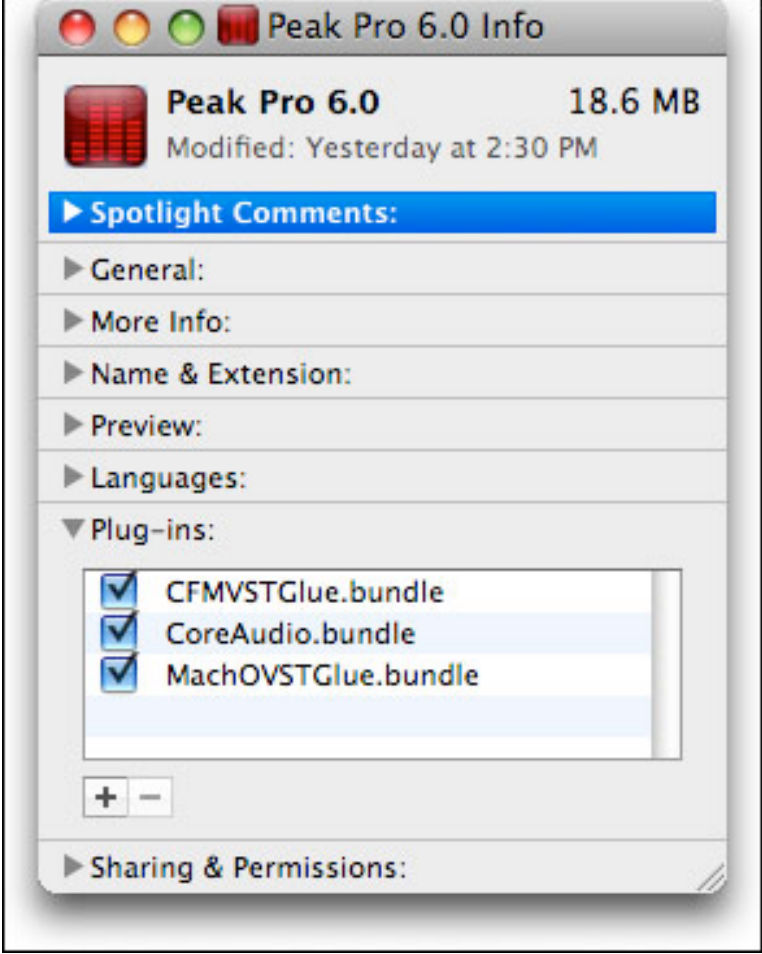

8. Close window and launch Peak 6 — MP3 and MP2 should both be available in the save as dialog within Peak 6

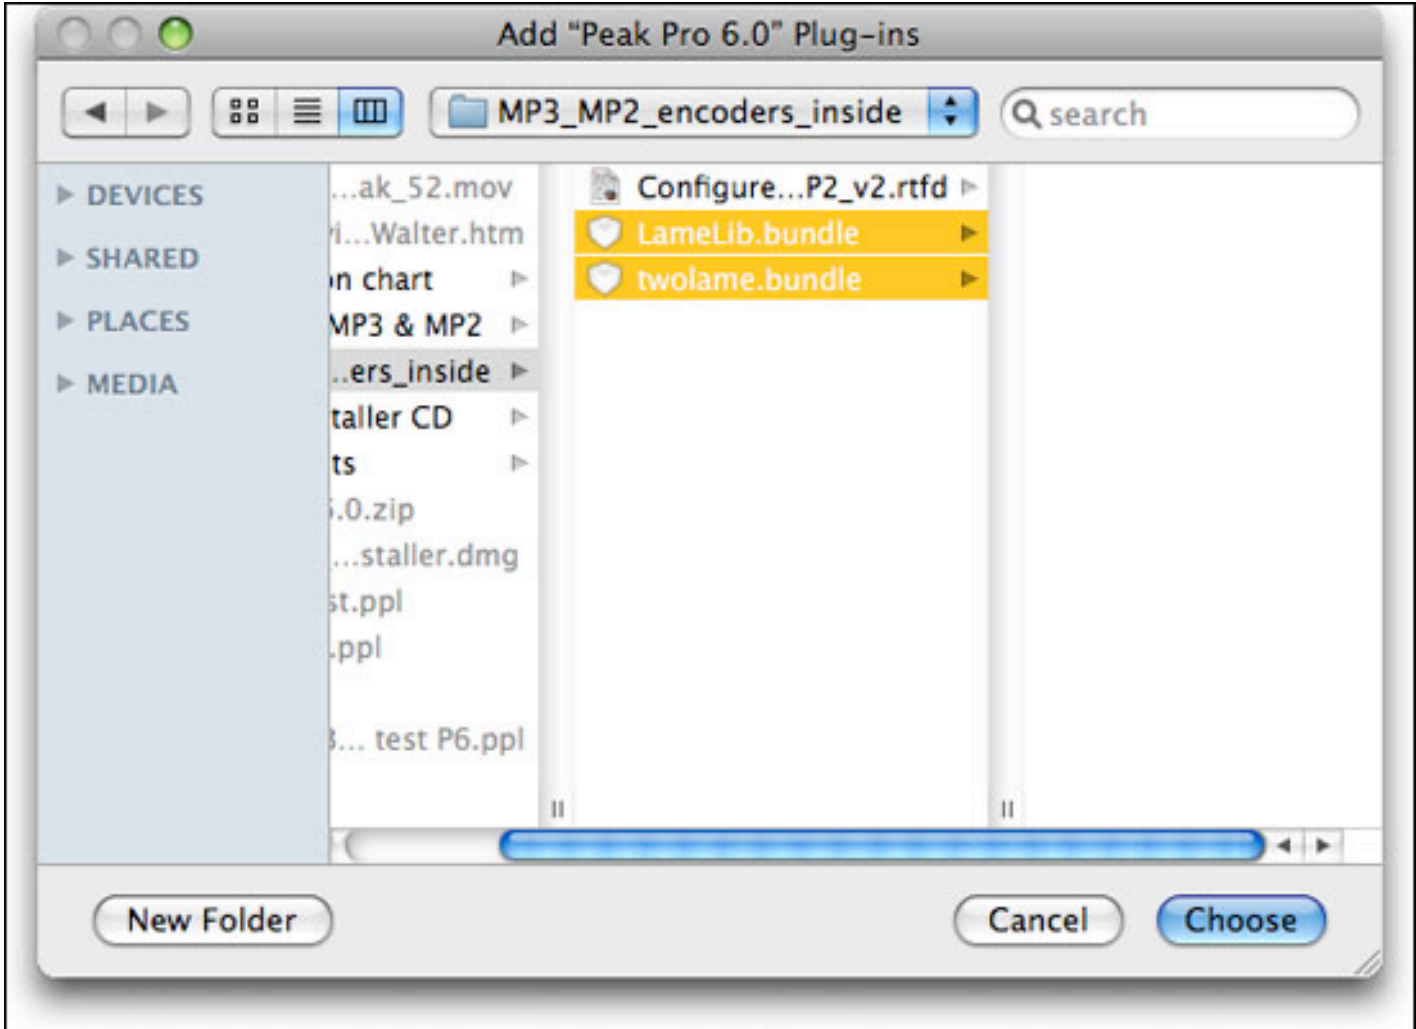

Please follow these steps to install the downloadable MP3 and MP2 encoders in 10.5 and 10.4:

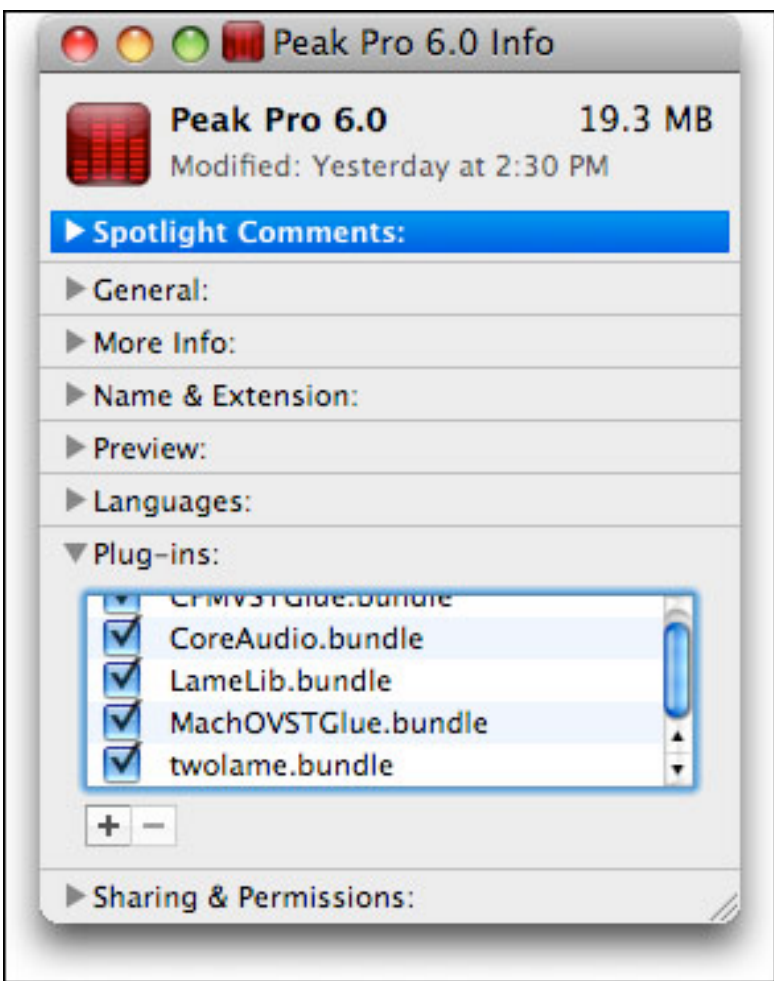

1. Download from this URL:
http://www.bias-inc.com/downloads/updates/archive/MP3_MP2_encoders_inside.zip
2. When this file is done downloading, it should un-Zip itself and create a folder called "MP3_MP2_encoders_inside". This folder contains both encoders and these instructions.
3. Use the Finder to locate the Peak application. Click on the Peak application icon once to highlight it.
4. In the Finder, go to File > Get Info (CMD-I). A window will open information about the application

5. Click on the disclosure triangle next to "Plug-Ins".
6. Click the "Add..." button. The "Add Peak Pro 6.0 Plug-ins" dialog will appear. Navigate into the folder "MP3_MP2_encoders_inside" and select LameLib.bundle and twolame.bundle, then click "Choose".

* Please note you have to close the "Plug-Ins" viewer and reopen for twolame.Bundle to appear in the list.

MP3 and MP2 now will show up as an available file format under the Save As dialog.
